

AI BUSINESS LAUNCH KIT 2026

[AI Business Launch Kit 2026](#)

sold through [Aqvani.shop](#)

Start Here

Welcome. You now own a complete, practical system for turning a business idea into a real, AI-assisted business - without needing to be technical.

This is not an ebook. It is a working toolkit: prompts, worksheets, checklists, planners, scripts, and templates you fill in and use immediately. You will get more value from opening a worksheet and typing into it than from reading this kit cover to cover.

Core promise: turn your business idea into an AI-powered business launch system - without needing to be a technical expert.

This kit will not guarantee income, guarantee virality, or run your business for you. It gives you a repeatable process, the exact prompts to use at each step, and the templates to organize your work. What you build with it is up to you.

What's In The Box

#	File	What it's for
02	AI_BUSINESS_LAUNCH_GUIDE	The core system: idea -> validate -> customer -> offer -> brand -> automate
03	AI_PROMPT_VAULT	150+ ready-to-use AI prompts organized by business task
04	BUSINESS_WORKBOOK	15 printable worksheets covering your whole business
05	30_DAY_LAUNCH_PLANNER	A 7-day launch sprint + a full 30-day roadmap
06	AI_TOOL_STACK	A practical AI tool directory by category
07	MARKETING_SWIPE_FILE	Content calendar, hooks, outreach scripts, sales kit, swipe copy
08	LAUNCH_CHECKLIST	One master checklist from idea to launch
09	AI_BUSINESS_DASHBOARD	A one-page business dashboard + KPI tracker (spreadsheet)
10	BONUS_CONTENT_IDEAS	100 content ideas for ongoing marketing

Also included: your **License** (what you can and can't do with this kit) and this **Start Here** guide.

How To Use This Kit

1. **Don't read everything first.** Start with the 60-Minute Quick Start below, then move to the 7-Day Launch System in file 05.
2. **Work in order the first time.** Idea -> Validate -> Build -> Brand -> Market -> Launch -> Improve. Each step feeds the next.
3. **Use the prompts as written, then customize.** Every prompt in the Prompt Vault has a "variables to

customize" section - replace the bracketed placeholders with your own details before pasting into your AI assistant of choice (Claude, ChatGPT, or similar).

4. **Print the workbook.** The worksheets in file 04 are designed to be printed or filled in digitally, one per business decision.

5. **Treat the dashboard as a living document.** Update file 09 weekly once you launch - it's your business at a glance.

6. **Verify tool details before you rely on them.** AI tools, pricing, and features change quickly. Anywhere this kit references a specific tool, treat the details as a starting point and confirm current pricing/features before use.

A Note On Honesty

This kit does not promise you will make money, go viral, or build a six-figure business. No course, template, or AI prompt can guarantee a specific business outcome - results depend on your market, effort, offer, and execution. What this kit *does* guarantee is a clear, complete process and the exact tools to execute it without wasting weeks figuring out where to start.

The Fictional Example: "AI Growth Studio"

Throughout this kit, you'll see one running example used to demonstrate each template in action: **AI Growth Studio**, a fictional one-person business offering AI-assisted marketing setup for local service businesses (plumbers, dentists, salons, contractors).

AI Growth Studio is entirely fictional. It is used only to show you what a filled-in worksheet, offer, or prompt output looks like. It is not a real company, and no figures shown for it are real performance data.

You'll see it walk through: Idea -> Customer -> Offer -> Branding -> Content -> Leads -> Sales -> Launch - the same path you'll walk with your own idea.

Your First 60 Minutes

You don't need a business plan to start. You need one idea, one customer, one problem, one offer, one channel, and one next action. Set a timer and work through this now.

00-10 min - Pick a direction

Open file 02, Module 1 (AI Business Idea Finder). Skim the 50 idea list. Circle 3 that use a skill or interest you already have. Don't overthink - you're shortlisting, not deciding.

10-20 min - Choose one idea

Run the "Idea Comparison Prompt" (Prompt Vault, Business Ideas category) on your 3 shortlisted ideas. Pick the one with the highest combined score on problem clarity + your ability to deliver it.

20-30 min - Name your customer

Open the Ideal Customer Profile worksheet (file 04, Worksheet 3). Fill in just the top third: who they are, what they do, where they spend time online. Don't fill in every field - just enough to picture one real person.

30-40 min - Name the problem

Open the Customer Pain Point Map (file 02, Module 2). Write down the one problem your customer would pay to have solved, in their own words, not yours.

40-50 min - Sketch one offer

Use the AI Offer Creator prompt (Prompt Vault, Offer Creation category). Paste in your idea, customer, and problem. Let the AI draft a Starter Offer. Don't polish it - just get a first draft.

50-60 min - Pick one channel and one action

Choose the single marketing channel where your customer already spends time (file 06 can help you decide). Write down the one action you'll take in the next 24 hours - one outreach message, one post, one conversation.

By the end of this hour you will have:

- One business idea
- One target customer
- One problem
- One offer concept
- One marketing channel
- One next action

That's the whole point. Everything else in this kit exists to help you go deeper on each of those six things.

Where This Kit Was Built For

This product is sold through **Aqvani.shop** - a digital-product store for solopreneurs, freelancers, creators, and small-business owners building AI-assisted businesses. If you purchased this kit anywhere else, or received it from someone other than the original buyer, please see the License file - resale and redistribution outside Aqvani.shop are not permitted.

Questions, updates, and future bonus drops for this kit will be posted through Aqvani.shop. Check back there periodically for revisions, since AI tools and best practices move fast.

Ready?

Set your timer. Open file 02. Start your 60 minutes now.
