

AI BUSINESS LAUNCH GUIDE

[AI Business Launch Kit 2026](#)

sold through [Aqvani.shop](#)

AI Business Launch Kit 2026 - File 02

This guide covers the first half of the system: finding a business idea, validating it, finding your customer, building your offer, branding it, and setting up your first automations. Work through the modules in order.

Throughout, watch for the **AI Growth Studio** callouts - a fictional example business used to show each template filled in. It is not a real company.

MODULE 1 - AI BUSINESS IDEA FINDER

1.1 The AI Business Idea Generator - 50 Ideas

These are starting points, not guarantees. Every idea needs validation (Section 1.2) before you commit time or money. No income figures are implied by any entry below - "difficulty" and "startup requirements" describe effort and setup only.

Category A - AI Services (done-for-you work using AI tools)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
2	AI resume & LinkedIn profile rewrites	Job seekers, career changers	Resumes don't pass screening or read poorly	Flat-fee resume + profile rewrite	Drafts and restructures content from a intake form	1:1 async with one revision round	Beginner	Intake questionnaire, writing AI tool
3	AI meeting-notes & follow-up service	Busy consultants, small teams	Meetings aren't documented or followed up on	Monthly subscription per team	Transcribes and summarizes recordings into action items	Recurring, delivered via shared doc	Beginner	Transcription tool, summarization AI tool
4	AI-assisted podcast show notes & clips	Podcast hosts	Repurposing episodes into text/clips takes hours	Per-episode or monthly package	Transcribes, summarizes, and drafts clip captions	Recurring, async	Intermediate	Transcription + video/audio editing tool
5	AI-powered customer review response service	Local businesses with online reviews	Owners don't have time to respond to reviews professionally	Monthly review-management retainer	Drafts on-brand responses from review text	Recurring, human-approved before posting	Beginner	Review platform access, writing AI tool

Category B - AI Automation (workflows that connect tools)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
---	---------	-----------------	----------------	-----------------	--------------	----------------	------------	----------------------

7	AI-assisted email inbox triage system	Solo founders, consultants	Inbox overwhelm slows response times	Setup fee for a custom triage workflow	AI drafts replies and flags priority emails for review	Project-based build	Intermediate	Email platform, automation tool, AI writing tool
8	Social comment-to-DM automation	Coaches, creators with active comments	Missed comments = missed leads	Setup + monthly management	AI drafts DM replies from comment context for human approval	Project-based build, ongoing option	Intermediate	Social platform access, automation tool
9	AI-assisted appointment reminder & no-show reduction system	Salons, clinics, service businesses	No-shows cost revenue	Setup fee, flat or tiered	AI drafts and schedules personalized reminders	Project-based build	Beginner-Intermediate	Booking system, automation tool
10	AI-powered document intake & sorting workflow	Small firms handling paperwork (real estate, bookkeeping)	Manual sorting/renaming of documents is slow	Project-based automation build	AI classifies and files documents by type	Project-based build	Advanced	Automation tool with file-handling integration

Category C - Digital Products (built once, sold repeatedly)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
12	Notion/spreadsheet business planner template	Solopreneurs, side-hustlers	No organized system to plan a business	One-time purchase template	AI helps design and write template copy/instructions	Instant digital download	Beginner	Notion or spreadsheet software
13	AI-assisted online course on a specific skill	Beginners wanting a specific skill	Free content is scattered and unstructured	Tiered course pricing	AI helps draft scripts, outlines, and materials	Self-paced digital delivery	Intermediate	Course platform, recording setup
14	Swipe file / script pack for a specific industry	Freelancers or business owners in that industry	Writing from scratch is slow	One-time purchase pack	AI drafts and varies scripts across scenarios	Instant digital download	Beginner	AI writing tool, store platform
15	Canva/design template bundle with AI-assisted copy	Small business owners, creators	No design skill or time for on-brand assets	One-time purchase bundle	AI drafts template copy variations	Instant digital download	Beginner	Design tool (e.g., Canva)

Category D - AI Consulting (advice and strategy)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
---	---------	-----------------	----------------	-----------------	--------------	----------------	------------	----------------------

17	One-on-one AI workflow coaching	Solo professionals wanting to use AI daily	They don't know how to build AI into their routine	Session packages (e.g., 3 or 6 sessions)	AI used live to demonstrate workflows	1:1 video calls	Beginner-Intermediate	Video call tool, your own working AI toolkit
18	AI content strategy consulting for creators	Creators with inconsistent content	No system behind their content output	Strategy package (audit + plan)	AI helps analyze existing content and draft a plan	1:1 or small group sessions	Intermediate	Content analysis process, AI tool
19	AI tool-stack selection consulting	Small teams overwhelmed by tool options	Too many AI tools, no clarity on what fits	Flat-fee consulting session + written recommendation	AI helps compare options against the client's needs	1:1 session + report	Beginner-Intermediate	Up-to-date tool knowledge (see File 06)
20	Fractional "AI ops" advisor for small teams	Small businesses (5-20 staff)	No one owns AI adoption internally	Monthly retainer	AI used to build/document internal workflows	Recurring, async + periodic calls	Advanced	Business process documentation skill

Category E - AI Content Businesses (content as the product)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
22	Faceless short-form video channel (AI-assisted scripting)	Broad audience interested in a topic	Wants entertaining/educational content in a niche	Ad revenue / sponsorships / lead gen for other offers	AI drafts scripts, captions, hooks	Recurring content publishing	Intermediate	Video editing tool, voiceover tool
23	AI-assisted local news/community content page	Local community members	Hard to find hyper-local updates in one place	Sponsorship / local business ads	AI helps summarize public local info into posts	Recurring publishing	Intermediate	Local information sources, content platform
24	Niche AI-curated content digest (e.g., "AI in marketing")	Busy professionals in that field	Too much information to track manually	Paid subscription digest	AI summarizes sources into a digest draft	Recurring publication	Beginner-Intermediate	Content sources, newsletter/blog platform
25	AI-assisted ghostwriting for founders/executives	Founders wanting a content presence	No time to write their own posts	Monthly ghostwriting retainer	AI drafts from voice notes/interviews for human editing	Recurring, async	Intermediate	Interview process, writing AI tool

Category F - AI-Assisted Freelancing (services delivered faster with AI)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
---	---------	-----------------	----------------	-----------------	--------------	----------------	------------	----------------------

27	AI-assisted graphic design freelancer	Small businesses needing simple design work	Design agencies are slow/expensive for small jobs	Per-project or package pricing	AI-assisted image generation and layout drafts	Project-based, async	Intermediate	Design + AI image tools
28	AI-assisted virtual assistant service	Busy solopreneurs and small teams	Admin work eats founder time	Hourly or retainer VA package	AI drafts emails, schedules, and summaries for review	Recurring, async + some calls	Beginner	Organizational systems, AI writing tool
29	AI-assisted translation/localization freelancer	Businesses expanding to new markets	Human translation is slow/costly for high volume	Per-project pricing	AI drafts translations for human review/QA	Project-based, async	Intermediate	Language fluency, translation AI tool
30	AI-assisted bookkeeping data entry support	Small businesses behind on bookkeeping	Manual data entry/categorization is tedious	Monthly retainer	AI helps categorize transactions for human review	Recurring, async	Intermediate	Bookkeeping software access, accuracy process

Category G - AI Education (teaching others to use AI)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
32	Beginner AI prompting course	Total beginners to AI tools	Overwhelm and unclear starting point	Tiered self-paced course	AI helps draft lesson content and examples	Self-paced digital course	Beginner-Intermediate	Course platform, recording setup
33	AI literacy training for small business staff	Small business owners/teams	Staff don't know how to use AI safely and well	Corporate/team training package	AI used to build practice exercises	On-site or virtual training session	Intermediate	Training materials, presentation skill
34	AI homework/study-help tutoring (human + AI hybrid)	Students needing subject support	AI alone can be unreliable without guidance	Session packages	AI assists explanations, tutor verifies accuracy	1:1 or small group sessions	Intermediate	Subject expertise, video call tool
35	"AI for parents" guide and community	Parents concerned about AI and kids	Confusion about AI tools their children use	Paid community + guide	AI helps draft educational content	Digital guide + community platform	Beginner	Parenting/education knowledge, community platform

Category H - AI Marketing Services (helping others market with AI)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
---	---------	-----------------	----------------	-----------------	--------------	----------------	------------	----------------------

37	AI-assisted ad copy testing service	Small businesses running paid ads	Ad copy isn't tested or optimized	Per-campaign or monthly package	AI drafts multiple ad variations to test	Project-based or recurring	Intermediate	Ad platform access, copywriting AI tool
38	AI-assisted email marketing setup & management	Small e-commerce or service businesses	No email marketing system in place	Setup fee + optional monthly management	AI drafts sequences and subject lines	Project-based, then recurring option	Intermediate	Email platform, AI writing tool
39	AI SEO content service for local businesses	Local service businesses	Weak/no presence in local search	Monthly content + optimization retainer	AI drafts SEO-structured content for review	Recurring, async	Intermediate	Basic SEO knowledge, writing AI tool
40	AI-assisted brand voice & messaging service	Startups and small brands	Inconsistent messaging across channels	One-time brand voice package	AI drafts and tests messaging options	Project-based deliverable	Intermediate	Branding framework (see Module 4)

Category I - AI Productivity Services (helping people/teams work smarter)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
42	AI meeting-prep and briefing service	Executives, sales teams	Prep for meetings takes too long	Per-meeting or monthly package	AI drafts briefing docs from research/notes	Recurring, async	Intermediate	Research process, writing AI tool
43	Team knowledge-base builder using AI	Growing small teams	Institutional knowledge lives in people's heads	Project-based build	AI helps draft and organize documentation	Project-based deliverable	Intermediate	Documentation tool (Notion, Confluence, etc.)
44	AI-assisted daily planning/coaching service	Busy solopreneurs	Struggle prioritizing daily tasks	Monthly coaching + AI planning tool setup	AI helps structure daily/weekly plans	Recurring 1:1 check-ins	Beginner	Planning framework, AI tool
45	AI-assisted process documentation (SOPs) for small business	Small business owners scaling up	No written processes for delegation	Project-based SOP package	AI drafts SOPs from a walkthrough/interview	Project-based deliverable	Intermediate	Interview process, writing AI tool

Category J - AI Research Services (information-gathering as a service)

#	Concept	Target Customer	Problem Solved	Suggested Offer	How AI Helps	Delivery Model	Difficulty	Startup Requirements
---	---------	-----------------	----------------	-----------------	--------------	----------------	------------	----------------------

47	Market opportunity scouting for solopreneurs	Aspiring entrepreneurs choosing a niche	Overwhelmed by options, no data to decide	Per-report or session package	AI helps compile and organize findings	Project-based deliverable	Intermediate	Research process, AI research tool
48	AI-assisted customer survey design & analysis	Small businesses wanting customer feedback	Don't know how to design/interpret surveys	Per-project package	AI drafts survey questions and summarizes results	Project-based deliverable	Intermediate	Survey tool, AI analysis prompts
49	Industry trend briefing service	Small business owners, consultants	Hard to keep up with fast-moving trends	Monthly briefing subscription	AI helps compile and summarize trend sources	Recurring, async	Intermediate	Reliable information sources
50	AI-assisted due-diligence research for buyers	People considering buying a small business/franchise	Manual due diligence is slow and easy to miss things	Per-engagement package	AI helps organize and cross-check research findings	Project-based deliverable	Advanced	Research process, business-basics knowledge

AI Growth Studio example: From this list, the fictional founder behind AI Growth Studio shortlisted #36 (AI-assisted social media management for local businesses) and #6 (Lead-intake automation for local businesses), then combined them into one productized offer: "done-for-you AI-assisted marketing setup for local service businesses." You'll see this offer built out in Module 3.

1.2 AI Idea Validation System

Do not skip this. An idea is a guess. Validation turns a guess into a decision you can act on with confidence - not a guarantee of success, but a reasoned one.

Business Idea Validation Worksheet

Fill in for your top 1-3 shortlisted ideas.

IDEA NAME: _____

1. In one sentence, what does this business do?

2. Who exactly is the customer? (Be specific - not "small businesses," but "solo dentists in mid-size towns")

3. What problem does it solve for them?

4. How do you know this problem is real? (List evidence - see Demand Research Worksheet)

5. How would they pay to solve it today? (Competitors, workarounds, DIY effort)

6. What would you actually deliver, step by step?

7. What could stop this from working? (Be honest)

8. What's the smallest version you could test this week?

Problem Validation Checklist

Check each box only if you can point to real evidence, not assumption.

- ☐ I can name 3+ real people/businesses who have this problem
- ☐ I have seen this problem mentioned unprompted (forum, review, comment, conversation)
- ☐ People currently spend time, money, or effort working around this problem
- ☐ The problem is specific enough that a solution can be clearly described
- ☐ I could explain this problem back to a stranger from that audience and they'd agree
- ☐ This problem happens often enough to justify a recurring or repeat-purchase offer

If you can't check at least 4 of 6, go back to research before building anything.

Customer Pain Point Finder

Use this to surface pain points from real sources before you guess.

Where to look:	What to capture:
☐ Reddit/forum threads in niche	-> exact phrases people use to describe the problem
☐ Facebook/LinkedIn groups	-> recurring complaints or questions
☐ App/product reviews (1-3 star)	-> what's missing or frustrating
☐ Competitor comment sections	-> unmet needs mentioned by customers
☐ Direct conversations (5+ people)	-> what they've tried and why it didn't work

Record at least 10 raw quotes before drafting your offer - you'll reuse these in Module 3 and Module 6 for copywriting.

Demand Research Worksheet

1. Search volume/interest signals for this problem/solution: _____
2. Existing paid solutions in this space (list 3+): _____
3. Price range of existing solutions: _____
4. Communities/groups where this audience already gathers: _____
5. Evidence people already pay to solve this (not just complain about it): _____
6. Is demand growing, stable, or shrinking? What tells you that? _____

Competitor Research Template

COMPETITOR NAME: _____

What they offer: _____

Who they target: _____

Pricing (note: verify current pricing before relying on it): _____

What customers praise (from reviews): _____

What customers complain about (from reviews): _____

Your potential angle of difference: _____

Repeat for at least 3 competitors or close alternatives (including "doing it manually" as an alternative).

AI Opportunity Scorecard

Score each idea 1 (low) to 5 (high) on each factor. This is a decision aid, not a guarantee of success - a high score means the idea deserves a real test, not that it will succeed.

IDEA: _____

Customer problem clarity	[1] [2] [3] [4] [5]
Demand evidence	[1] [2] [3] [4] [5]
Ease of delivery	[1] [2] [3] [4] [5]
AI leverage (does AI meaningfully speed/improve delivery?)	[1] [2] [3] [4] [5]
Startup complexity (5 = simple)	[1] [2] [3] [4] [5]
Differentiation	[1] [2] [3] [4] [5]
Monetization options	[1] [2] [3] [4] [5]

TOTAL: ____ / 35

Idea Comparison Matrix

	IDEA A	IDEA B	IDEA C
Problem clarity	___	___	___
Demand evidence	___	___	___
Ease of delivery	___	___	___
AI leverage	___	___	___
Startup complexity	___	___	___
Differentiation	___	___	___
Monetization options	___	___	___
TOTAL	___	___	___

Business Idea Decision Worksheet

Idea selected: _____

Why this one over the others: _____

Biggest risk: _____

How I'll test the riskiest assumption this week: _____

What "good enough to continue" looks like: _____

MODULE 2 - AI CUSTOMER & NICHE FINDER

"Find Your First Customer" System

Ideal Customer Profile

Industry / niche: _____

Business size or life stage: _____

Role/title (if B2B): _____

Biggest daily frustration related to your offer: _____

Where they spend time online: _____

What they've already tried to solve this: _____

Budget range they likely have available: _____

Customer Persona

Name (fictional): _____

Age range: _____

Occupation: _____

Goals: _____

Frustrations: _____

A typical day for them: _____

What would make them say "finally, someone gets it"?: _____

Customer Pain Point Map

Surface complaint (what they say): _____

Underlying problem (what's really wrong): _____

Cost of the problem (time/money/stress): _____

What they've tried that didn't work: _____

What a real solution would need to do: _____

Customer Desire Map

What they want to stop doing: _____
 What they want to start doing: _____
 How they want to feel after working with you: ____
 What result would make them refer you to others: ____

Problem Awareness Levels

Identify where your customer sits - your messaging changes depending on the level.

[] Unaware - doesn't know they have this problem
 [] Problem-aware - knows the problem, not the solutions
 [] Solution-aware - knows solutions exist, hasn't picked one
 [] Product-aware - knows about businesses like yours, hasn't chosen
 [] Most aware - ready to buy, just needs the right offer/CTA

Buying Trigger Worksheet

What event/moment makes this customer start looking for a solution?

What makes them decide "now" instead of "later"?

What would make them hesitate or delay?

Customer Research Questions

Use these in interviews, surveys, or casual conversations:

1. Walk me through the last time you dealt with [problem].
2. What have you tried to fix it?
3. What didn't work about that?
4. If you had a magic wand, what would the solution look like?
5. What would you need to see to trust a new solution?
6. What's stopped you from solving this already?
7. What would you expect to pay for a real fix?

Customer Interview Script

Opening: "Thanks for chatting - I'm researching [problem area] and want to understand your experience, not pitch you anything today."

Warm-up: "Tell me a bit about your [role/business]."

Core questions: (use Customer Research Questions above)

Closing: "This has been really helpful. Would it be okay if I followed up once I've built something, just to get your honest take?"

Copy-Paste AI Prompts for Module 2

Competitor Research Prompt

Act as a market research analyst. I am building a business in the [NICHE] space targeting [TARGET CUSTOMER]. List the most likely existing competitors or alternative solutions (including manual/DIY alternatives). For each, summarize: what they offer, who they target, their likely pricing model (note that I should verify current pricing), and one gap I could position against. Be specific and avoid generic statements.

Niche Research Prompt

Act as a business strategist. I'm considering serving [NICHE/AUDIENCE] with [BUSINESS IDEA]. Help me evaluate this niche by outlining: common daily problems this audience faces related to [PROBLEM AREA], where this audience is likely to gather online, what language/terms they use to describe their problem, and 3 ways I could position an offer to stand out. Do not invent statistics - flag anything that needs independent verification.

Ideal Customer Profile Prompt

Act as a customer research consultant. Based on this business idea: [BUSINESS IDEA], and this rough target: [TARGET DESCRIPTION], draft a detailed Ideal Customer Profile covering: demographics/firmographics, daily frustrations, current workarounds, where they spend time online, and likely budget range. Keep it realistic and avoid overly broad descriptions like "everyone" or "small businesses."

Customer Persona Prompt

Act as a UX researcher. Using this Ideal Customer Profile: [PASTE ICP], create one specific fictional persona representing this customer, including their goals, frustrations, a typical day, and what would make them feel this business "gets" them.

Pain Point Extraction Prompt

Act as a qualitative researcher. Here are raw quotes/notes from my target audience: [PASTE QUOTES/NOTES]. Identify the 5 most common underlying pain points (not just surface complaints), grouped by theme, with 1-2 supporting quotes each.

Buying Trigger Prompt

Act as a consumer psychology consultant. For a customer who is [CUSTOMER DESCRIPTION] dealing with [PROBLEM], identify the likely events or moments that would trigger them to actively search for a solution now, and what would make them delay. Keep this grounded in plausible behavior, not assumptions presented as fact.

Interview Question Generator Prompt

Act as a research interviewer. I want to validate this problem: [PROBLEM] with this audience: [AUDIENCE]. Draft 8 open-ended interview questions that avoid leading the interviewee toward a specific answer, and that would reveal whether this problem is real and painful enough to pay to solve.

Problem Awareness Diagnosis Prompt

Act as a marketing strategist. Based on this customer description: [CUSTOMER DESCRIPTION] and this problem: [PROBLEM], which stage of problem awareness (unaware, problem-aware, solution-aware, product-aware, most-aware) are they most likely at, and what messaging approach fits that stage?

Customer Desire Prompt

Act as a customer insight analyst. For a customer dealing with [PROBLEM], describe what they most want to stop doing, start doing, and how they want to feel after solving this problem. Ground this in the problem itself, not generic aspirational language.

Niche Comparison Prompt

Act as a business strategist. Compare these potential niches for my offer [OFFER/IDEA]: [NICHE 1], [NICHE 2], [NICHE 3]. For each, assess problem clarity, likely willingness to pay, and how easily I could reach this audience. Recommend one, with reasoning.

AI Growth Studio example: The fictional founder's Ideal Customer Profile: "Owner-operators of local service businesses (HVAC, dental, salons) with 1-10 staff, no in-house marketing person, currently posting inconsistently or not at all, spending time on Google/Facebook but not systematically." Their buying trigger: a slow month, or a competitor visibly out-marketing them.

MODULE 3 - AI OFFER BUILDER

AI Offer Creator

Fill in these six inputs, then use the Offer Draft Prompt below to generate a first draft.

[SKILL]: _____
 [BUSINESS IDEA]: _____
 [TARGET CUSTOMER]: _____
 [CUSTOMER PROBLEM]: _____
 [DESIRED OUTCOME]: _____
 [DELIVERY METHOD]: _____

Offer Draft Prompt

Act as a direct-response offer strategist. Using these inputs:

Skill: [SKILL]

Business idea: [BUSINESS IDEA]

Target customer: [TARGET CUSTOMER]

Customer problem: [CUSTOMER PROBLEM]

Desired outcome: [DESIRED OUTCOME]

Delivery method: [DELIVERY METHOD]

Draft a complete offer including: product/service name, one-sentence positioning statement, value proposition, 5 core features, 5 corresponding customer benefits, a deliverables list, pricing considerations (structure, not specific guaranteed amounts), 3 package options (starter/core/premium), 5 FAQ entries, and one clear call-to-action. Do not make income or results guarantees anywhere in the copy.

The output covers: **Offer, Product/Service Name, Positioning, Value Proposition, Features, Benefits, Deliverables, Pricing Considerations, Package Options, FAQ, CTA.**

Offer Frameworks

Starter Offer

A low-commitment entry point that proves value fast.

Purpose: reduce risk for a first-time buyer

Scope: one narrow deliverable, fast turnaround

Price positioning: lowest tier of your offer stack

Example structure: single deliverable + 1 revision, delivered within a fixed short window

Core Offer

Your primary, most-promoted offer.

Purpose: the main transformation you sell

Scope: the full deliverable set solving the core problem

Price positioning: mid tier, anchors your value

Example structure: multi-part deliverable + defined timeline + limited support window

Premium Offer

Highest-value, highest-touch version.

Purpose: serve customers who want more done-for-them, faster, or with more access to you

Scope: everything in Core, plus added speed, customization, or direct access

Price positioning: top tier

Example structure: Core deliverables + priority turnaround + 1:1 strategy time + extended support

Productized Service

A service sold like a product - fixed scope, fixed price, fixed process.

Define: exact deliverable, exact timeline, exact price, exact process steps
 Avoid: open-ended scope, custom quotes per client
 Why it works with AI: AI speeds up the repeatable steps, keeping your delivery time predictable

Digital Product

A template, prompt pack, planner, or guide sold without ongoing delivery effort.

Define: the specific transformation or time saved
 Format: PDF, spreadsheet, template, prompt pack
 Pricing: one-time purchase, tiered by scope (see Pricing section, file 13 listing)

AI Consulting Offer

Advice and strategy, not hands-on execution.

Define: the specific decision or plan the client walks away with
 Format: audit, session, or written recommendation
 Boundaries: be explicit about what's included in scope vs. what requires a separate engagement

Additional Offer Prompts

Positioning Statement Prompt

Act as a positioning strategist. For [BUSINESS/OFFER] serving [TARGET CUSTOMER] with the problem [PROBLEM], write 5 alternative one-sentence positioning statements in the format: "[Business] helps [customer] do [outcome] without [pain point]." Avoid vague claims and unverifiable superlatives.

Pricing Structure Prompt

Act as a pricing strategist. For this offer: [OFFER DESCRIPTION] sold to [TARGET CUSTOMER], suggest 3 pricing structure options (e.g., flat-fee, tiered, retainer) with pros and cons of each for a beginner solopreneur. Do not suggest specific dollar amounts as guaranteed market prices - instead explain how to research a fitting price point.

FAQ Generator Prompt

Act as a customer-support-minded copywriter. For this offer: [OFFER DESCRIPTION], draft 8 FAQ entries addressing the most likely objections or confusions a first-time buyer would have, including scope, timeline, what happens after purchase, and refund/guarantee policy (leave a placeholder for my actual policy).

Package Comparison Prompt

Act as an offer strategist. Turn this core offer: [OFFER DESCRIPTION] into 3 tiers (Starter, Core, Premium) with a clear feature-by-feature comparison table, making the differences obvious at a glance.

AI Growth Studio example - Offer: "AI-Assisted Local Marketing Setup." Starter: one AI-optimized Google Business Profile + 10 post captions (\$ set by founder after market research). Core: profile setup + 30-day content calendar + lead-capture automation. Premium: Core + monthly management retainer. (No prices are asserted as market-accurate - this is illustrative only.)

MODULE 4 - AI BRANDING QUICK-START KIT

Fill in your business basics once, then reuse them across every generator below.

[BUSINESS NAME OR IDEA]: _____
[TARGET CUSTOMER]: _____
[CORE OFFER]: _____
[PROBLEM SOLVED]: _____
[DESIRED BRAND FEELING]: _____ (e.g., trustworthy, bold, calm, expert)

Business Name Generator Prompt

Act as a naming consultant. Based on this business: [BUSINESS IDEA/OFFER] targeting [TARGET CUSTOMER], generate 15 business name options across 3 styles: descriptive (clearly states what you do), suggestive (implies a benefit/feeling), and invented (unique, brandable). Avoid names that are hard to spell or pronounce aloud.

Brand Positioning Generator Prompt

Act as a brand strategist. For [BUSINESS NAME] serving [TARGET CUSTOMER] with [CORE OFFER], write a brand positioning statement covering: who we serve, what we do differently, and why it matters to them. Keep it to 2-3 sentences, no jargon.

Tagline Generator Prompt

Act as a copywriter. For [BUSINESS NAME], write 10 short tagline options (under 8 words each) that reflect [DESIRED BRAND FEELING] and hint at [PROBLEM SOLVED].

Brand Promise Generator Prompt

Act as a brand strategist. For [BUSINESS NAME], write a one-sentence brand promise: what a customer can always count on from us, tied to [CORE OFFER] and [DESIRED BRAND FEELING].

Unique Value Proposition Generator Prompt

Act as a positioning strategist. For [BUSINESS NAME] offering [CORE OFFER] to [TARGET CUSTOMER], write 5 UVP options that clearly state the specific outcome we deliver and how we're different from [main alternative/competitor type].

Brand Voice Generator Prompt

Act as a brand voice consultant. Define a brand voice for [BUSINESS NAME] that feels [DESIRED BRAND FEELING] to [TARGET CUSTOMER]. Provide: 3 voice traits (with a do/don't example each), and a short "voice in action" sample paragraph.

About Page Generator Prompt

Act as a brand copywriter. Write an About page for [BUSINESS NAME], covering: what we do, who we help, why this business exists, and how we work. Tone: [DESIRED BRAND FEELING]. Length: 200-300 words. Avoid fabricated credentials, awards, or client numbers.

Website Hero Generator Prompt

Act as a conversion copywriter. Write 5 homepage hero section options for [BUSINESS NAME], each with a headline, subheadline, and CTA button text, targeting [TARGET CUSTOMER] and focused on [DESIRED OUTCOME].

Instagram Bio Generator Prompt

Act as a social media copywriter. Write 5 Instagram bio options (under 150 characters) for [BUSINESS NAME], including what we do, who we help, and a link CTA.

LinkedIn Bio Generator Prompt

Act as a professional copywriter. Write a LinkedIn "About" section for [BUSINESS NAME/founder], covering expertise, who we help, and how we help, in a professional but approachable tone. 3-4 short paragraphs.

Brand Messaging Framework Prompt

Act as a brand strategist. Build a one-page brand messaging framework for [BUSINESS NAME] including: positioning statement, 3 key messages (each with one supporting proof point I can fill in), tone of voice summary, and words/phrases to avoid.

AI Growth Studio example: Positioning: "AI Growth Studio helps local service businesses look active and responsive online - without the owner spending nights writing posts." Brand voice: practical, friendly, no jargon.

MODULE 9 - AI AUTOMATION STARTER KIT

Beginner-friendly workflows. None of these are fully autonomous - every workflow includes a human review step on purpose. Automation should remove repetitive work, not remove your judgment.

Workflow 1 - Lead -> Form -> AI Qualification -> Spreadsheet

Trigger:
Input:
AI step:
Human review:
Output:
Suggested
Setup steps:
1. Build
2. Connect
3. Add a
4. Review

Workflow 2 - Social Comment -> DM -> Lead Magnet -> Email

Trigger: Relevant comment on your content
 Input: Comment text and commenter profile
 AI step: AI drafts a personalized DM offering the lead magnet
 Human review: You approve/edit the DM before sending
 Output: DM sent, lead magnet delivered, email captured for follow-up
 Suggested tools: Social platform + AI writing tool + email capture tool
 Setup steps:
 1. Prepare one lead magnet (see File 07)
 2. Draft a DM template with the AI prompt below
 3. Check comments daily, use the draft as a starting point, personalize, send
 4. Add responders to your email list with consent

Workflow 3 - Customer Inquiry -> AI-Assisted Response -> CRM

Trigger:
 Input:
 AI step:
 Human review:
 Output:
 Suggested
 Setup steps:
 1. Give
 2. Draft
 3. Log t

Workflow 4 - Content Idea -> AI Writing -> Review -> Publishing

Trigger:
 Input:
 AI step:
 Human review:
 Output:
 Suggested
 Setup steps:
 1. Pull
 2. Run t
 3. Edit

Workflow 5 - New Customer -> Welcome Email -> Onboarding Checklist

Trigger:
 Input:
 AI step:
 Human review:
 Output:
 Suggested
 Setup steps:
 1. Draft
 2. Build
 3. Conne
 4. Spot-

This completes File 02. Continue to File 03 (AI Prompt Vault) for the full 150+ prompt library, or jump to File 05 for your 7-day and 30-day launch plans.
