AI Business Launch Kit 2026 - File 07

This file covers your full marketing engine: a 30-day content calendar, a lead generation system with magnet templates and outreach scripts, a complete sales kit, and a bonus swipe file of ready-to-adapt copy.

None of the hooks, headlines, or scripts below are guaranteed to perform any specific way - they're described as "attention-grabbing" or "effective structures," not promises of virality or sales. Always personalize before using, and never use a hook that misrepresents what you're actually offering.

PART C - AI SALES SYSTEM (Module 8)

Sales Conversation Framework

1. OPEN - build rapport, set the agenda ("Today I'd love to understand your situation and see if this is a fit - sound good?")
2. DISCOVER - ask open questions about their problem, goals, and current situation
3. REFLECT - summarize what you heard back to them, confirm you understood correctly
4. PRESENT - introduce your offer as a direct response to what they told you, not a generic pitch
5. ADDRESS - invite and answer questions/objections honestly
6. CLOSE - propose a clear, specific next step

Discovery Call Script

OPENING (1-2 min)

"Thanks for making time, [Name]. My plan for today is to understand what's going on with [problem area], and then I'll share how I might be able to help - and if it's not a fit, that's a completely fine outcome too. Sound good?"

DISCOVERY QUESTIONS (10-15 min)

- "Tell me about where things stand right now with [problem area]."
- "What have you already tried?"
- "What's not working about that?"
- "If this were solved, what would be different for you/your business?"
- "What's your timeline for figuring this out?"
- "Is there anyone else involved in this decision?"

TRANSITION

"Based on what you've shared, here's how I typically help people in your situation..."

PRESENT YOUR OFFER (5 min)

[Use your offer draft from File 02, Module 3]

CLOSE

"Does this feel like a fit based on what we talked about? What questions do you have?"

[Propose the specific next step - proposal, start date, or a follow-up call.]

Qualification Questions

1. "What's prompting you to look into this now?"
2. "What have you tried already, and what happened?"
3. "What's your rough timeline for solving this?"
4. "Who else, if anyone, is involved in this decision?"
5. "What would need to be true for this to feel like a clear yes?"
6. "Is there a budget range you're working within for this?"

Proposal Template

[BUSINESS NAME] - Proposal for [Client Name]

Date: _____

SITUATION SUMMARY

[2-3 sentences reflecting back what they told you in discovery]

PROPOSED SOLUTION

[What you'll do, in plain terms]

DELIVERABLES

- [Deliverable 1]
- [Deliverable 2]
- [Deliverable 3]

TIMELINE

[Start date] -> [Key milestones] -> [Completion/ongoing structure]

INVESTMENT

[Package/price - filled in per client]

NEXT STEPS

[Exactly what happens if they say yes - e.g., "Reply to confirm, I'll send the intake form and we'll schedule a kickoff call."]

Follow-Up System

- Day 0 - Send proposal, confirm they received it
- Day 3 - "Just checking you had a chance to look this over - happy to answer any questions."
- Day 7 - "Wanted to check in again - is there anything holding this back, or should I adjust anything in the proposal?"
- Day 14 - "I'll go ahead and close this proposal out for now - if timing changes down the road, I'm happy to revisit."

Objection Handling Framework

- STEP 1 - Acknowledge: "That's a fair thing to think about."
- STEP 2 - Clarify: "Can you tell me more about what's behind that?"
- STEP 3 - Respond: Address the specific concern with a direct, honest answer (not a scripted deflection).
- STEP 4 - Check: "Does that help clarify things, or is there more to it?"

Common objections + response starting points:

Objection	Response Starting Point
"I need to think about it"	"Totally fair - what's the main thing you're weighing?" (surfaces the real objection)
"I've tried something like this before and it didn't work"	Ask what specifically didn't work, then explain how your approach differs
"I don't have time right now"	Clarify what your process actually requires of their time - it may be less than they assume

"I want to compare options first"

Support the comparison honestly - offer what makes your approach specifically different
