50 Video Templates

24 Photo Templates

100 Hooks

50 CTAs

Canva Editable

For personal and client use. Not for resale or redistribution. Results depend on your product, offer and execution.

UGC Ad Creative Template Kit

Editable UGC-Style Video & Photo Ad Templates for Paid Ads, Organic Social & Product Promotion

01 — Start Here

You don't need to be a professional video editor or hire a UGC creator to start creating native-looking social ads.

This kit is a done-for-you UGC ad creative system: pick a template, fill in the brackets, film on your phone, drop the clips into Canva, and export. Idea → Hook → Script → Visual → CTA → Ad — in one sitting.

The System in One Picture

1. What's Included

File	What it is	Count
01_Start_Here	This guide + template links page	—
02_UGC_Video_Templates	Full video ad templates with second-by-second timelines	50
03_UGC_Photo_Templates	Static ad layouts with copy and photo direction	24
04_100_UGC_Hooks	Bonus 1 — Hook swipe file in 14 angles	100
05_50_CTA_Ideas	Bonus 2 — CTAs by industry and commitment level	50
06_UGC_Script_Formulas	Bonus 3 — Reusable story structures + when to use each	25
07_UGC_Shot_List	Bonus 4 — Shots to batch-film	60
08_30_Day_Content_Calendar	Bonus 5 — Day-by-day posting plan	30 days
09_AI_UGC_Prompt_Pack	Bonus 6 — ChatGPT/Claude prompts	24
10_Canva_Editing_Guide	Design system, sizes, safe zones, fonts, export	—

File	What it is	Count
11_Industry_Adaptation_Playbook	Worked examples for 15 industries	15
Canva template links	Editable versions of the video & photo templates, UI elements, end cards	See Template Links page

2. How to Access the Templates

1. Open the **Template Links** page at the end of this guide.
2. Click a link while logged in to Canva (a free account works; some features like Background Remover and Brand Kit need a paid plan).
3. Canva will ask **"Use template"** → click it. This creates **your own copy** in your Canva account. The original stays untouched, so you can always start fresh.
4. Rename your copy (e.g., "V01 – My Brand – Oct") so you can find it later.

No Canva? Every template in the PDFs includes full layout, copy and timing instructions, so you can rebuild them in CapCut, InShot, Adobe Express, or your phone's built-in editor.

3. How to Edit a Template (5-Minute Version)

1. **Choose a template** using the Quick Selector at the end of File 02.
2. **Fill in the script:** copy the voiceover column from the template's timeline into your notes app and replace every [bracket] .
3. **Film** the scenes listed in the timeline (use the Shot List, File 07, for framing).
4. **Open the Canva template** → replace the placeholder clips/photos → edit the text.
5. **Export** (see step 8) and post.

4. How to Replace Photos & Videos

1. In Canva, click **Uploads** (left panel) → **Upload files** → select your clips/photos. On mobile: tap + → **Uploads**.
2. **Drag** your file directly onto the grey placeholder frame — it snaps into place.
3. **Double-click** the media to reposition or crop inside the frame.
4. For video: select the clip → **scissors** icon or drag the clip's edges on the timeline to trim to the scene length in the template.
5. If a clip shows black bars: right-click → **Set image/video as background** or scale it up to fill.

Filming tip: shoot vertically (9:16), face a window, hold each shot 3–5 seconds longer than you need.

5. How to Customise Colours

1. Click any coloured element (text pill, sticker, card).
2. Click the **colour tile** in the top toolbar.

- 3. Enter your brand hex code (e.g., #FF6B4A).
- 4. Click **"Change all"** to swap that colour everywhere in the design at once.
- 5. Paid plan: add your colours to **Brand Kit** once and apply across every template in one click.

Use your brand colour as an **accent only** (CTA pills, highlights, ticks). Keep backgrounds neutral so the ads still look native.

6. How to Add Your Logo

- 1. Upload a **transparent PNG** logo (one white, one dark version).
- 2. Drag it onto the canvas.
- 3. **Photo ads:** bottom-right corner, about 100 px wide, ~80% transparency setting.
- 4. **Video ads:** only on the final end-card page, or leave it off — the product itself is your branding, and UGC ads generally feel more native without a big logo.

7. How to Customise the Scripts

Use this 4-step method on any template:

Step	Do this	Example
1. Replace the pain	Use a phrase your real customers use	"My cheeks feel tight by lunch" (from a review)
2. Replace the product line	One sentence, plain words — what it does, not what it is	"One layer and I'm done"
3. Replace the proof	Something specific and true	"Second tub", "14-day trial", "ships in 2 days"
4. Replace the CTA	Match your goal (File 05)	"Try it free" vs "Shop now"

Read it out loud with a timer. If you run over the suggested duration, cut adjectives first.

Faster: paste the template into Prompt 02 in File 09 with your Brand Brief and let an AI assistant draft it — then fact-check and adjust the wording to sound like you.

8. How to Export the Final Creative

Asset	In Canva	Setting
Video ad	Share → Download → MP4 Video	1080p · all pages
Photo ad	Share → Download → PNG	Original size
Carousel	Share → Download → PNG	All pages (downloads as separate images)

Before exporting, run the **Pre-Export Checklist** (File 10, section 17).

9. Using the Creative for Organic Content

- **Post natively:** upload the exported MP4 directly to each platform (don't cross-post with another platform's watermark).
 - **Add platform-native touches:** trending or commercially licensed sounds, native text stickers, polls and question boxes on Stories.
 - **Caption:** use the template's caption suggestion, first line = hook or CTA.
 - **Reply to comments with video** (template V50) — it turns objections into new content.
 - **Follow the 30-Day Calendar** (File 08) to post consistently without thinking about what's next.
 - **Track** 3-second hold rate, average watch time, saves and shares — they tell you which hooks and templates your audience responds to.
-

10. Adapting the Creative for Paid Advertising

1. **Start with what worked organically.** A post with above-average watch time or saves is your first ad candidate.
 2. **Make 3 hook variations** of the same ad (swap only the first 3 seconds using File 04). Test them against each other.
 3. **Export the right sizes:** 9:16 for Reels/Stories/TikTok, 4:5 for Feed. Re-check safe zones — ad placements show extra buttons.
 4. **Match the CTA** to the ad's button and campaign objective ("Shop Now" button → "Shop now" CTA).
 5. **Write ad copy** with Prompt 15 (File 09): short primary text, a headline, one description.
 6. **Stay compliant:** no guaranteed results, no fake reviews, no fake urgency. Use real testimonials only with permission. Disclose paid partnerships and affiliate links. Check each platform's current advertising policies — especially for health, beauty, finance and before/after content.
 7. **Refresh creatives regularly:** audiences get used to the same ad. Rotating templates and hooks from this kit helps keep your ads feeling new.
 8. **Judge by your business numbers** (cost per purchase/lead, return on ad spend), not just views.
-

Your First Hour (Recommended)

Time	Task
0–10 min	Fill in the Brand Brief (File 09, top)
10–15 min	Pick 3 templates from the Quick Selector (File 02)
15–25 min	Write 3 scripts, choose 3 hooks each (File 04)
25–45 min	Film using the Shot List (File 07)
45–60 min	Edit in Canva, export, schedule

You'll end the hour with 3 ads and 9 hook variations ready to test.

Template Links (Seller: replace placeholders before publishing)

Pack	Templates	Size	Link
A — Problem → Solution	V01–V08	9:16	[CANVA TEMPLATE LINK]
B — Product Discovery	V09–V16	9:16	[CANVA TEMPLATE LINK]
C — Testimonial / Review	V17–V24	9:16	[CANVA TEMPLATE LINK]
D — Demo / Showcase	V25–V32	9:16	[CANVA TEMPLATE LINK]
E — Founder / Personal Brand	V33–V38	9:16	[CANVA TEMPLATE LINK]
F — Educational	V39–V44	9:16	[CANVA TEMPLATE LINK]
G — Offer / Sales	V45–V50	9:16	[CANVA TEMPLATE LINK]
H — Photo Templates (Feed)	P01–P24	4:5	[CANVA TEMPLATE LINK]
I — Photo Templates (Story)	Selected	9:16	[CANVA TEMPLATE LINK]
J — Carousel	P18	4:5	[CANVA TEMPLATE LINK]
K — End Cards & CTA Pills	—	9:16 / 4:5	[CANVA TEMPLATE LINK]
L — UI Elements Library	Bubbles, review cards, chips, stars, ✓/✗	—	[CANVA TEMPLATE LINK]
M — Subtitle Style Presets	4 styles	9:16	[CANVA TEMPLATE LINK]

Licence Summary

-  Use the templates for your own business or for client work (as finished ads).
-  Edit, remix and adapt the copy and layouts as much as you like.
-  Don't resell, share or redistribute the templates, PDFs or Canva links themselves, edited or unedited, as templates.

This kit provides templates and guidance; results depend on your product, offer, audience and execution. No specific sales or performance outcomes are guaranteed.
