06 — 25 UGC Script Formulas (Bonus 3)

Reusable Story Structures — With Exactly When to Use Each One

How to Use a Formula

1. Choose the formula that matches your **audience awareness** and **objective** (selector table at the end).
2. Write **one sentence per block**. Most 15–30 second ads need only 5–7 sentences.
3. Assign each block a **visual** — if you can't picture it, simplify it.
4. Read it aloud with a timer. Cut words until it fits.

Awareness levels used below: - **Unaware** — doesn't know they have the problem - **Problem-aware** — feels the pain, doesn't know solutions - **Solution-aware** — knows solutions exist, comparing options - **Product-aware** — knows you, hasn't bought - **Customer** — has bought, could buy again or refer
