Canva Social Media Template Pack

90 editable Instagram & Facebook designs — 20 post layouts and 10 story layouts in 3 ready-made color themes.

Edit in Canva with a free or Pro account

Instagram · Facebook

How to edit your templates in Canva

Each theme folder contains two PDF files. Canva turns every page of an imported PDF into an editable design, so every headline, shape and color stays fully editable.

1

Open Canva

Log in at canva.com (a free account works). From the home page, choose **Upload** or **Create a design** → **Import file**.

2

Import a PDF

Pick the PDF for the theme and format you want, e.g. *Terracotta-Sand/Instagram-Facebook-Posts-1080x1080.pdf*. Canva opens it as a new multi-page design.

3

Edit the text

Double-click any text to replace it with your own words. Fonts are Playfair Display and Poppins — both free inside Canva.

4

Add your photos

Click a "Drop your photo here" box, delete it, and drag in your image, or drop a Canva frame (Elements → Frames) in its place so photos crop neatly.

5

Change colors in one click

Select any shape, click the color swatch, and choose a new color. Use **Change all** to recolor that color across the whole design.

6

Download & post

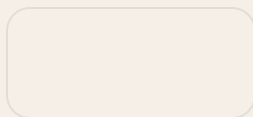

Click **Share** → **Download**, choose PNG (or JPG), and pick the pages you need. Upload straight to Instagram or Facebook.

Tip: Story templates keep the top and bottom of the screen clear so Instagram's profile bar and reply box never cover your message. Dashed boxes mark where to place interactive stickers (poll, countdown, questions, link).
