

Viral Hook Generator

Turn Any Topic Into Hundreds of Scroll-Stopping Hook Ideas

A premium, beginner-friendly spreadsheet system for Instagram, TikTok, and YouTube creators, coaches, consultants, freelancers, social media managers, digital-product sellers, and small-business owners who are tired of staring at a blank screen trying to write the perfect hook.

Works in both **Google Sheets** and **Microsoft Excel**.

The Idea

Writing hooks from scratch feels hard because it's treated as a creative leap. This spreadsheet turns it into a repeatable process instead:

Choose a formula → Enter your topic → Add your angle → Generate variations → Test your favorites.

It does not promise viral results, guaranteed views, or guaranteed followers — no tool can. What it delivers is a fast, organized way to produce dozens of genuinely different hook options for any topic, so there's always something worth testing.

What's Inside ([Viral-Hook-Generator.xlsx](#))

#	Tab	What it does
1	START HERE	Welcome page, 3-step quick start, workflow diagram, worked example, tips
2	Hook Generator	The main tool — fill in 10 yellow input cells, get up to 30 live hook variations
3	Formula Library	120 hook formulas across 24 categories (Curiosity, Mistake, Contrarian, Story, etc.)
4	Niche & Keyword Library	51 niches, each with example keywords — fully editable
5	Pain Points	110 audience pain points, organized by category
6	Desired Outcomes	110 desired outcomes, organized by category
7	Content Angles	55 content angles with a one-line usage tip for each
8	Tone Library	14 tones with a description and example phrase
9	Platform Guide	Hook style, length, and goal for 8 platforms
10	Hook Examples	208 ready-to-use example hooks across 16 niches
11	Testing Tracker	Log real performance (views, likes, saves, etc.) — no invented "viral score"
12	Power Words	100 hook words grouped into 8 categories (curiosity, urgency, emotion, etc.)
13	CTA Library	50 natural calls-to-action grouped by goal
14	30-Day Challenge	A daily hook-writing and testing plan, one formula type per day
15	Rewrite Tool	Paste a weak hook, rewrite it 10 different ways using guided techniques

The Hook Generator is formula-driven (`INDEX` / `MATCH` / `COUNTIF` / `SUBSTITUTE` / `IFERROR` — no volatile or version-locked functions), so it recalculates live in both Excel and Google Sheets and stays fully editable: customers can add their own niches, pain points, outcomes, angles, and formulas at any time.

Product Positioning

FROM: "I don't know how to write a good hook." **TO:** "I have dozens of hook ideas I can test."

No hook, formula, or spreadsheet can guarantee views, followers, watch time, or sales — this is stated plainly on the START HERE tab and the Testing Tracker. The product is positioned as a speed and ideation tool, not a performance guarantee.

Quality-Control Checklist

- [x] All 331 formulas recalculate with zero errors in both LibreOffice/Excel-compatible engines
 - [x] Only Excel-2007-era functions used (`INDEX` , `MATCH` , `COUNTIF` , `MOD` , `SUBSTITUTE` , `IFERROR` , `IF`) — no `XLOOKUP` / `FILTER` / `UNIQUE` / `SORT` that could silently fail in older Excel or Google Sheets
 - [x] Dropdowns (data validation) on every Hook Generator input, sourced from the library tabs, and editable/typeable rather than locked
 - [x] Freeze panes + autofilter on every data tab for easy Browse/filter
 - [x] Distinct input (yellow) vs. output (teal) cell coloring so it's obvious where to type vs. where results appear
 - [x] Every formula count meets or exceeds the brief: 120 formulas (100+), 51 niches (50+), 110 pain points (100+), 110 desired outcomes (100+), 55 content angles (50+), 208 example hooks (200+), 100 power words, 50 CTAs
 - [x] No banned filler phrases ("unlock the power of", "revolutionize", "game-changing", "take your business to the next level")
 - [x] No viral/guarantee claims anywhere in the workbook
 - [x] Professional font (Calibri) and consistent visual system throughout
 - [x] Tested end-to-end with sample inputs across every one of the 24 hook categories
-

Packaging Structure

```
products/viral-hook-generator/  
├─ README.md           ← this file (product/QC summary)  
└─ Viral-Hook-Generator.xlsx ← the deliverable customers download
```

For the storefront listing, pair this with a product title, the positioning line above, and 3-5 preview screenshots of the START HERE, Hook Generator, and Formula Library tabs.
